

Fall, 2002 ~ 70,000 Died!

**Don't let them destroy our
customs and culture! Bring
the Klamath salmon home!**

In September and October of 2002 as many as 70,000 adult fall-run Chinook salmon died from unnaturally induced causes. Please help us assure that this will never happen again, print and post this poster widely during the month of October 2005 to help bring down the dams and fix water quality in the West's third largest river. Fish need clean water and habitat to live!
